HEALTH BOARD REPORT.

WE, the undersigned Health Board of the town of Colebrook respectfully submit herewith our 7th. annual report. The town and village districts have been for the past year remarkably free from contagious diseases, there being a number of infection cases, more particularly typhoid fever, there being one fatal case from this disease. In no case were we able to trace the source. The water derived from the village water supply has been examined by the State Chemist twice during the past year and reported free from contamination. The board has made systematic inspection of the village and has caused such changes and removals as in their judgment required. We have also visited all school houses in the town districts and when found necessary called the school board's attention to the same. Have caused all public drinking cups and towels to be permanently discontinued, requesting individual cups. We have endeavored to attend promptly to the investigation of all complaints made to the board, and to advise such measures only as seemed to us necessary for the public health.

We would respectfully recommend the selection of a more suitable site for the public dump; at present being too near the highway, and at times a menace to public health.

Respectfully submitted,

Edwin A. Cook,
Edward E. Twombly,
D. S. Pease,
} Health Board of Colebrook
